

FOR IMMEDIATE RELEASE

Innovative Advantage and Qualitel ship 1000th AVDS Node
Fiber Optic Audio Video Distribution System (AVDS)

Redmond WA. – May 3, 2013 – Innovative Advantage and Qualitel shipped their 1000th Audio Video Distribution System (AVDS) node for the general aviation market. The AVDS node is used to provide High Definition (HD) switching on new aircraft as well as transforming existing cabin management systems (CMS) from Standard Definition to HD. The AVDS has found a home on aircraft from the Gulfstream G150 to the Boeing Business Jet (BBJ).

“The AVDS is proving to be the high performance AV network that customers desire,” said Richard Morris, President, Innovative Advantage. “Not only does the customer get the best HD delivery system, it’s easy to integrate with any CMS, and the in-service reliability has been great. Our partner, Qualitel has done a great job in manufacturing and testing a very sophisticated part.”

“Qualitel is pleased to be the manufacturer of this advanced electronics product for the business jet market where quality and reliability are required. We are excited to help Innovative Advantage achieve this major milestone,” said Tuanhai Hoang, President. “We believe the combined efforts of our team and the engineers at Innovative Advantage created the most reliable product in this market.”

Innovative Advantage manufactures high definition audio/video distribution systems for business aviation. Providing the ultimate quality uncompressed video over fiber optics in a distributed network ring topology. Less cabling, lighter weight, no latency, flexible, scalable, and robust. Compatible with any cabin management system. The leader in HD with over 180 aircraft flying. Find out more at <http://www.In-Advantage.com>.

Qualitel provides a full range of contract electronics manufacturing services with the focus on High Mix, High Reliability product applications. Qualitel specializes in SMT, BGA, and Fine-Pitch technology for the aerospace, medical, industrial, and military markets with ISO9001, ISO13485, AS9100, ITAR and FDA registrations.
